

Azure Monitoring and Identity Management

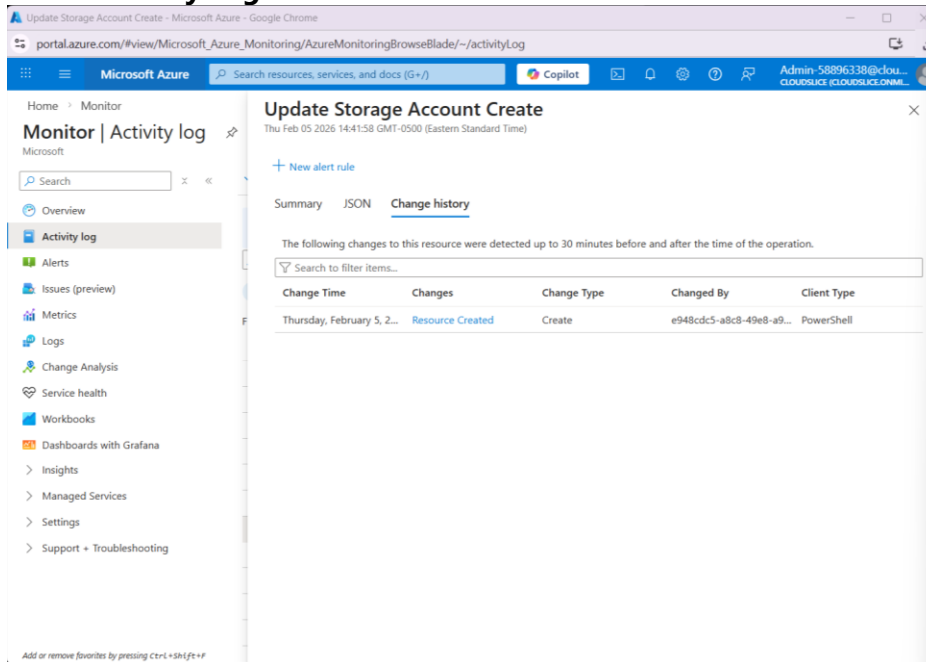

Project Overview

This document summarizes hands-on experience configuring monitoring, alerting, and identity management in Microsoft Azure using Azure Monitor and Microsoft Entra ID.

Monitoring and Alerting with Azure Monitor

This section documents the configuration of Azure monitoring and alerting capabilities, including activity log review, alert creation, and exploration of Azure Monitor tools for operational visibility.

Azure Activity Log Review

The screenshot displays the Azure Activity Log interface in a web browser. The left sidebar shows the navigation menu with 'Monitor | Activity log' selected. The main content area shows the details for the 'Update Storage Account Create' event, which occurred on Thursday, February 5, 2026, at 14:41:58 GMT-0500 (Eastern Standard Time). The event is categorized as 'Resource Created' and was performed by a user with ID 'e948cdc5-a8c8-49e8-a9...' using PowerShell. The interface includes a search bar, a 'New alert rule' button, and tabs for 'Summary', 'JSON', and 'Change history'.

Identity and Group Management with Microsoft Entra ID

This section documents the management of users and groups using Microsoft Entra ID, focusing on identity organization and access control within an Azure environment.

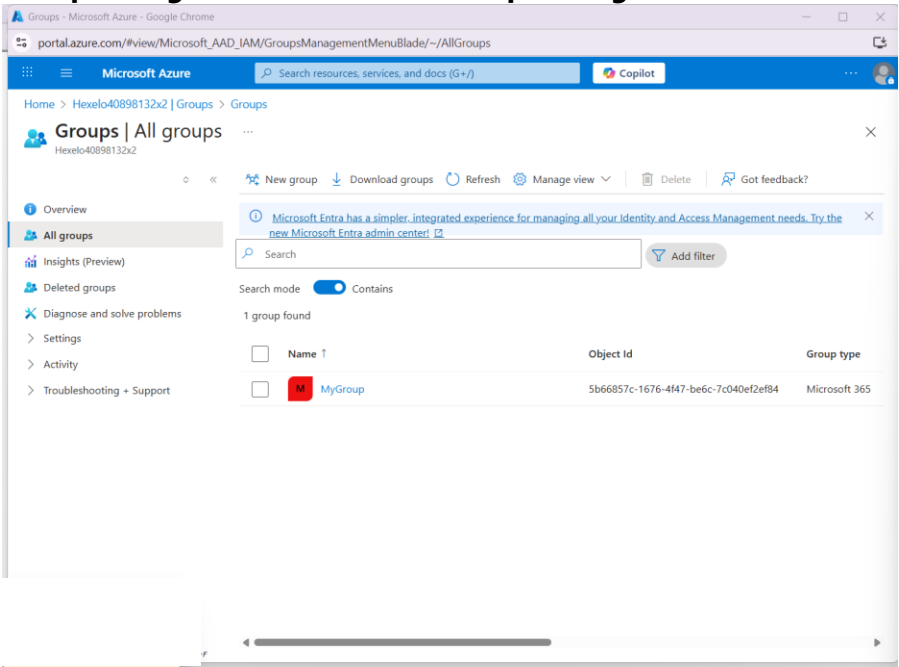

Modified the Technical Contact for the Microsoft Entra ID tenant

Microsoft Entra ID user management interface displaying configured users

Group configuration and membership settings in Microsoft Entra ID

User password reset and account management actions performed in Microsoft Entra ID.

Administrative account tasks were completed by resetting a user password and reviewing account status and access settings to ensure proper identity management.
